

Dance Away These Days

Does it feel the same ?
When you play the game alone
Scared to make another move

You don't wanna fall
Around the mirror ball again
I know what you mean

You want the world stay
You want the world stay
You want the world stay still

Someday the dark side of the moon will see the light

I want to float in space
With the music up
I wanna dance away these days
And If you feel the same
Put the phone away
And just dance away these days

Lost in a crowd
Looking for someone to hold
Falling to your knees

You want the world stay
You want the world stay
You want the world stay still

Someday the dark side of the moon will see the light

I want to float in space
With the music up
I wanna dance away these days
And If you feel the same
Put the phone away
And just dance away these days

Im want to bring you home
Back from the twilight zone

I want to float in space
With the music up
I wanna dance away these days
And If you feel the same
Put the phone away
And just dance away these days
I want to float in space
With the music up
I wanna dance away these days
